Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. In response to applicant's arguments, the recitation "operable at .001 HP or less" in claim 1 has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

In addition, Paisley, Sugai et al., and Du et al. all show the brush holder surrounding the tip of the brush in Figure 2, Figure 1D, and Figure 5, respectively although there are slots for the springs. Figure 5 of the present application also shows the brush holder (60) covering the tip of the brush although there is a slot (55) for the spring (53). Figures 1-4 are prior art figures in the present application.

As a result, the rejections of claims 1-6 are still deemed proper and repeated hereinafter.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2834

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Paisley (4,843,27) and Sugai et al. (6,031,313) individually.

Paisley and Sugai et al. individually shows all of the limitations of the claimed invention in claim 1 in Figure 3 and Figure 2, respectively. The phrase "operable at .001 HP or less" is not given any patentable weight.

4. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Du et al. (6,744,170).

Regarding claim 1, Du et al. shows a brush and brush holder assembly (Figure 3) for a micro horsepower (HP) electric motor operable at .001 HP or less (patentable weight not given), comprising:

- A brush (28) having a tip (74);
- A brush holder (24) surrounding the tip of the brush;
- A shunt (30) carrying current to the tip of the brush; and
- An independent coil wire spring (26) applying constant pressure to the brush.

Regarding claims 2-6, it is noted that Du et al. also shows all of the limitations of the claimed invention.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
